

## Why Choose University Of Life & Hope Systems

1. **"Motivational" seminars or just reading a book fade quickly like any fad.**

They create excitement, only in the moment, and therefore produce short-term results that never last. My U of Life & Hope system demonstrates exactly how to use proven and advanced cross cultural enriched techniques so you can go from where you are now to where you really can and want to be. In order to achieve long-lasting results, improvements must occur on the inside first.

2. **Human beings are both physical and spiritual in nature;** to achieve outstanding results, you must understand the connection between the two. More important, you must understand how to access and utilize the infinite power available from both sources. Our System, **teaches you how to utilize the power of your individual gifts and talents, in conjunction with the power of the "universal intelligence"** that many talk about but few really know how to teach and apply. This combination is an unbeatable solution, and what is the missing link, in my opinion, for truly achieving ones true and heartfelt potential. Mastering the self in teaching enhances your skills, brings value and benefits everyone.

3. **Achieving extraordinary results requires a shift in thinking,** behavior and attitude. As humans, our nature is to become attached to the habits, beliefs and behaviors that have "worked" for us in the past. We often believe "if we just work harder we'll achieve better results ". Unfortunately, with this type of thinking, we often find ourselves making incremental gains if any, and not **the "millennium forward thinking leap we are truly capable of"**. Our current results teaching Native children in my opinion are the by-product of past thinking and old conditioning. Do not believe for a second that you are achieving all you can. Why is that? Simple, most of our beliefs are limited due to the people who taught us. They did the best they could with the information and experiences of their time.

**For the Indian children, previous conditioning is in need of specific attitude first aid. Many Teachers bring with them stereo typical thinking. Most want to teach to their best capability. We are here to infuse the truth and options not taught in books. Our system offers the opportunity to expand knowledge and learn with the assistance of the Native people themselves....**

Our vision is that each of you creates and lives with the lasting positive human potential plan that you have always dreamed of in teaching or whatever your career is. Our expertise lies in showing you how to make the thinking shift necessary so you achieve extraordinary results in every area of your life including teaching of Native American child. Why? You deserve it and most important the children we are paid to teach and indeed our own families deserve it as well.
